DATA SCIENCE ASSIGNMENT
Credit card Fraud Detection(Stage -5&6)

5.Communicating Results:

Our Visualization models will Classify the bank Fraud's easily .We will be able to make our Machine Learning model's results to be shown in an easy way, therefore the client can have a better understanding of what has been done and Who are the Frauds in the bank. The process of communicating data insights will be effortlessly presentable to the larger audience as well. We would tend to use scatter plots, histograms and box plots and many such forms of pictorial representation to have efficient communication established between all the nodes of the process.

6.Operationalize:

After successfully having the necessary insights of the business by a data driven approach, it is now time for us to make the things work on a real scenario.
Our entire Machine Learning model coupled with the Visualizations is now ready to be deployed in the market or be given to the concerned stakeholders. In this final step of our plan, we ensure that our best model goes Will Predict the Bank Fraud's easily.
